Personal Skills Rubric

Your name: _____ Partner's name: _____

Project Topic: _____

You will use the rubric below for assessing your partners, as this is the only time that they will be assessed on personal skills for the duration of their enrollment in an IB science course. When you assess their participation, be honest. Give specific instances of times when this person demonstrated the criteria you are scoring them for. Do not just circle a level for each aspect!

Levels/marks	Aspect 1	Aspect 2	Aspect 3
	Self-motivation and perseverance	Working within a team	Self-reflection
Complete/2	Approaches the project with self-motivation and follows it through to completion.	Collaborates and communicates in a group situation and integrates the views of others.	Shows a thorough awareness of their own strengths and weaknesses and gives thoughtful consideration to their learning experience.
Partial/1	Completes the project but sometimes lacks self-motivation.	Exchanges some views but requires guidance to collaborate with others.	Shows limited awareness of their own strengths and weaknesses and gives some consideration to their learning experience.
Not at all/0	Lacks perseverance and motivation.	Makes little or no attempt to collaborate in a group situation.	Shows no awareness of their own strengths and weaknesses and gives no consideration to their learning experience.

Give specific instances where this person demonstrated characteristics that earned them the rating you have assigned them. Be honest in your assessment of their contributions to the group's effort.
